Buenos Aires.

ABOUT US

We are a company with wide experience in the market. We provide the oil industry with solutions regarding Safety and Health, and Quality.

We rely on our integral service of information digitalization which functions by means of applications especially designed to integrate operational processes with risk management, thus turning data into reports.

OUR PILLARS

- INTEGRATION
- INNOVATION
- TECHNOLOGY
- QUALITY

PUMACGS
SAFETY & SECURITY

OUR SERVICES

INCOMING CONTROL

We specialize in the thorough control of trucks transporting hazardous cargo to ensure compliance with the most demanding legal norms and regulations.
We use technological systems for check lists and online reports which streamline processes and provide confidence as well as trust.

We control incoming and outgoing materials and staff, thus receiving products (hydrocarbons), delivery notes, verifying cargo, sealed products, and tank stock. We also guarantee the integrity of our customer's facilities and goods.

PUMA AUDITING

We monitor all our customers' incoming requirements. We rely on a web platform for document self-management, in which gathered information is double checked, thus reducing legal risks within the premises.

OUR SERVICES

We offer preventive defensive driving programs which focus on early detection regarding immediate deviation, with root cause analysis for incidences as well as customized action plans.

COORDINATION OF EVENTS

We carry out satellite vehicle controls providing deviation analysis, safe stops control, online reports regarding maximum speed allowed, valves bonnet openings, continuous driving hours control and nighttime driving. We propose actions to guarantee safe driving when transporting hazardous goods.

VEHICLE MONITORING

We manage comprehensive plans in relation to environmental care, safety and health, as well as quality, complying with all legal requirements.

SAFETY & SECURITY

OUR SERVICES

Our mystery shoppers test the quality and the proper functioning of your commercial services. Therefore, we help redefine sales strategies, management, and quality service, thus aiming at increasing business profitability.

MISTERY SHOPPER

We count on our team which is aimed at professionalizing drivers so that they can acquire the proper practices regarding hazardous goods transportation, abiding by the standards of the ISO 39001:2015 norm. We draw up action plans to guarantee proper management and to reduce accidents and incidents in the plant.
